1999 Analytical Review DWCCA-4540-PJL

Dear Ms. Becker:

The Public Service Commission (Commission) is in the process of completing an analytical review of your utility's 1999 annual report. The purposes of an analytical review are to detect possible reporting or accounting related errors and to identify significant fluctuations from established trends in reported data not sufficiently explained in the annual report. It is our hope that our review will supply information that will enable us to better provide guidance to your utility regarding proper utility accounting and the preparation of future annual reports. In order to complete this review, we request the following information:

1. The PSC is establishing a database and guidelines for the average cost of meters. Based upon a review of your utility's data, the average cost of meters was \$184. Please provide copies of invoices for the 9 meters installed in 1999. In addition, please provide the average cost to install the meters. Thank you for your cooperation with our meter project.

2. Given that there are no water services reported as added during the year on page W-16 and no dollar additions reported to Account 345, Services reported on page W-8, please explain the \$350 reported as a contribution in aid of construction for water services on page F-17.

We appreciate your cooperation in providing the above information. These recommendations are intended to provide accounting assistance and should not be construed as criticisms of utility personnel. If you have any questions, please feel free to contact me at (608) 267-9198. Please

respond within 30 days of this letter. If we have no questions regarding your response, you can consider the review closed.

Sincerely,

Peter J. Leege
